“ *I miss you very much Dad! Thanks for always being there for me and making me into the man I am today. You taught me to be a hard worker, be responsible, and patience, Growing up, we never saw eye to eye and I wondered why you were always on my butt about things. Or kicking me and my friends outside to play instead of us being inside. It wasn't until I got older, did I realize what you were doing and all the hard work you did for us. You are my hero and i miss you terribly!*  
*Save some fish for me up there, and until then Big Pete, I LOVE YOU DAD*

“ God speed Big Pete!

*Was lucky enough to work with Pete for years at Alcoa in multiple departments.*

*Pete was the best Induction Furnace operator in the Alcoa smelting system. Pete and I made trips to other Alcoa locations so Pete could teach and share his experience with other operators.*

*Pete would go into work very early in the morning, if he ran into problems he would call me usually around 2-3am. He would say "hey buddy"! Whatcha doin? I'd answer trying to sleep Pete, and he'd have a good laugh!*

*There wasn't a more hardworking and dependable person on the planet!*

*Had nothing but total respect for Pete!*

*Ran into Pete and Travis in Pateros a couple years ago had a great visit with them both!*

*They were out fishing having an awesome time.*

*Rest in pease my friend! Losing you isn't easy!*

*Prayers to the Bennett family.. hold on to those great memories, I know I will!*

*Sincerely, Doug Stanaway*

“ So many good memories of working with Pete at Alcoa, also had the pleasure of getting firewood and fishing with him. Underneath that gruff exterior was an honest hardworking man who I will always be proud to say - "Was my friend."
